EDGE BANDING — Door Edge Banding Option

This option is only available for the Brilliant Door Collection and allows you to change the edge banding around the door, drawer fronts and filler trims from the standard matching edge banding to an accent edge banding or an aluminum faux finish edge banding. The accent edge banding has an area that matches the finish then shifts to the aluminum faux finish. The aluminum faux finish edge banding provides the appearance that the doors and drawers are wrapped in metal. This option will not change the front edge banding of the cabinet box. See the Brilliant Door Collection Finish Program for edge banding options availability for each finish.

To order, use the following item codes:

ACCE – Accent Edge Banding

ALFE – Aluminum Faux Finish Edge Banding
